>>> Welcome address

Dear Colleagues,

There are only a few months left before we will have in Barcelona the 16th Annual Scientific Meeting of the European Association for Osseointegration (EAO), which will take place from 25th to 27th October at the International Convention Centre and the Forum centre of our city.

After Zurich, we have taken on the challenge of becoming the next meeting point for professionals, for the exchange of experiences around the latest advances in scientific research and clinical practice in the field of osseointegrated implants. Under the title of *Contemporary Oral Implant Practice*, the meeting in Barcelona proposes an attractive debate programme that ranges from the function of implants in multidisciplinary oral rehabilitation to the latest clinical advances on immediate loading.

We also encourage you to take advantage of the platform at the EAO Annual Congress, to present your original research and clinical developments in the form of posters and oral presentations. This works will help us understand recent clinical innovations and our expectations for the future. You may find all relevant information and submission instructions at the congress website: www.eao.org

We are very proud of hosting this scientific forum about the future of osseointegration in Barcelona, a city that also walks steadily towards the future. You will have the opportunity to discover this mediterranean atmosphere, a welcoming, plural and diversified place that opens itself to innovation. You will enjoy its wonderful climate and its countless historical sites.

On behalf of the European Association for Osseointegration and the collaborating Spanish societies, it will be a pleasure welcome you to Barcelona in October 2007.
